VACUUM SUCTION SYSTEMS

View all suction systems from p.330 for a better comparison.

Accessories	Description		Use
① Lowering cylinder	manual hydraulic cylinder for fully adjustable, manual lowering of vacuum-suction systems		All types of equipment with suspension arm, not in conjunction with the short arm.
② Radio remote control	Radio module that controls all system motor functions with one or more hand transmitters,		All vacuum suction systems
③ Remote control	Remote control with spiral cable and quick-release connector,		All vacuum suction systems
④ Short arm	In tight spaces, especially for small panes or when glazing under lead, it is also ideal as an easy-to-exchange complement to the long arm.		Alternative for systems with normal arm, not in conjunction with a lowering cylinder
⑤ ISO holders	They protect the panes from slipping when they are hot and connected.		All vacuum suction systems
